

PryCube® XL and XXL

Packaging that ticks all the boxes!

The 1st 100% cardboard packaging for drop cables.

Advantages of the solution

- Fully recyclable:
average 18% improvement in environmental footprint*
- Packaging for 500m with built-in winder for effortless unwinding
- Ergonomic and lightweight
- Reel and cable protected from impacts
- Easy to handle and enhanced stability
- Cable marking to indicate remaining metres
- Optimised logistics and inventory

Presentation

Like the PryCube® XS and L dedicated to pre-connectorised connection cables, the XL and XXL versions are **perfectly suited to the demands of single cable deployment**. Their innovative design replaces existing solutions (e.g. cable drums) by incorporating an unwinding solution that does not require any extra accessories. Their dimensions were also calculated to make them easier for technicians to handle, as well as to optimise delivery. Made solely from cardboard, the PryCube® XL and XXL can be easily disposed of after use.

** Compared to classic packaging ranges with equivalent cable volume*

PryCube® packaging is part of the CasaLink & Verticasa ranges. Find the catalogues below by scanning the QR codes:

Characteristics

External diameters mm				Quantity/pallet (80x120) cm	Cable capacity/weight mm		
	Width	Length	Diameter		3mm	4mm	5mm
PryCube® XL	190	240	240	80 / height 120	500	250	N/A
PryCube® XXL	400	400	265	24 / height 122	1500	750	500

- The PryCube® XXL has a reel, two shaft holders and outer packaging to protect the product and make it easier to handle.
- See how much cable is left at a glance thanks to a cable marking system.
- This solution includes a usage tracking table to calculate the remaining amount within one metre.
- The shaft system allows effortless cable unwinding.
- In the XXL version, the cable can be pulled horizontally or vertically, allowing direct use on a platform.
